

ASHOK DHARMAVARAM

Game Developer | Unreal Engine Developer

Sesadripuram, Bangalore, Karnataka | 7093598161 | dharmavaramashok414@gmail.com

Technical Portfolio: <https://ashokis20.github.io/>

Professional Summary

Game Developer with professional experience at Karmaplay and expertise in Unreal Engine 5, gameplay systems, UI development, MetaHuman workflows, animation pipelines, optimization, technical art, environment creation, and interactive simulations. Skilled in both programming and content creation workflows for modern game development.

Work Experience

Game Developer — Karmaplay, Kerala (January 2025 – March 2026)

- Developed gameplay mechanics and interactive systems using Unreal Engine.
- Implemented UI systems, character integrations, and animation workflows.
- Collaborated with artists and designers to deliver production-ready game content.
- Optimized assets, gameplay systems, and performance for deployment.
- Participated in debugging, testing, and feature implementation.

Technical Skills

Game Development

Unreal Engine 5 (Blueprints, C++), Unity, UMG UI Development, MetaHuman, Cesium for Unreal, Gameplay Systems, Animation Blueprints, AI & Character Systems

Programming Languages

C++, C#, Java, Python, Rust, JavaScript, Swift

3D Art & Content Creation

ZBrush, Autodesk Maya, 3ds Max, MotionBuilder, Houdini, Marvelous Designer, Daz3D, Substance 3D Painter, Substance 3D Designer, Substance 3D Stager, MatrixGold

UI/UX & Design

Adobe XD, Figma, Adobe Illustrator, CorelDRAW, Adobe Photoshop

Video & Motion Graphics

Adobe After Effects, Adobe Premiere Pro, Adobe Media Encoder

Web & Software Development

HTML5, CSS3, JavaScript, Responsive Web Development, Portfolio Development

Operating Systems & Backend

Linux Server Administration, DevOps Fundamentals, Windows (.NET Ecosystem), macOS Development (Swift)

Version Control & Workflow

Git, Asset Optimization, LOD Management, Performance Profiling, Cross-functional Team Collaboration

Featured Projects

- Indian Lara Croft (MetaHuman Character Project) – Created an Indian-inspired Lara Croft character using MetaHuman, Maya, Marvelous Designer, Substance Painter and Unreal Engine.
- Warzone UI Showcase – Recreated a Call of Duty Warzone inspired UI using UMG, Adobe XD, Illustrator and Unreal Engine.
- Victor Train Station 1930s Environment – Built a detailed historical train station level with cinematic presentation and optimized assets.
- 9-Way Omni Directional Movement System – Implemented advanced locomotion and animation blending in Unreal Engine.
- New York Driving Simulation using Cesium – Developed a real-world geospatial driving simulation using Cesium for Unreal.
- Interactive Desert Environment – Designed and optimized a realistic desert environment.
- Dynamic Character Creation Pipeline – Character sculpting, clothing simulation, texturing and engine integration workflow.
- Optimized Game Assets for Real-Time Rendering – Converted high-poly assets into game-ready optimized content.

Education

B.Tech (Electronics & Communication Engineering)

Audisankara Institute of Science and Technology, Gudur (2022)
